

LAKESHORE
SPEECH THERAPY, LLC.

December 6, 2022

RE: Coronavirus COVID-19

At Lakeshore Speech Therapy, we prioritize the health and safety of our clients, families and therapists. Therefore, with the reported increase in COVID-19 cases, attached are the current recommendations from the CDC. For more information, we encourage you to visit the CDC's website, which you can access [HERE](#).

As part of LST's policy, the offices, surfaces, and toys are regularly cleaned. In addition, handwashing for at least 20 seconds occurs before and after therapy sessions, and hand sanitizers are available throughout the facility.

Lastly, if you have a runny nose, cough, fever, vomiting, diarrhea, conjunctivitis, or any contagious disease, please do not attend therapy until symptom-free for at least 24 hours. Your therapist will use their discretion and will not provide service to anyone outwardly exhibiting the above symptoms.

As always, LST thanks you for your patience and attention to these policy guidelines. If you have any questions, please direct them to LST Office Manager Kelly Rigo.
